### Details & Contents

#### Description

Ideal kit for vehicle or facility use. Weatherproof plastic case. Contains everything you need for effective and safe clean up of small spills. Plastic case, sold as Kit with 21 items. 20-piece blood borne pathogen (BBP) spill cleanup kit is for the safe cleanup, disinfection, and disposal of potentially infectious body fluids. It includes exam gloves, biohazard bag, scoop and spatula, absorbent powder, disinfectant cloth, towels, and antiseptic wipes.

The kit comes in a weatherproof plastic case with a carrying handle and holes for mounting on a vertical surface. Biohazard cleanup kits provide an assortment of cleaning tools and disposable personal protective equipment to safely clean up potentially infectious bodily fluids such as vomit, spit, blood, or urine. The personal protective equipment components of the kit help minimize exposure of personnel to potentially harmful substances.

Biohazard (also called biological hazards) cleanup kits may comply with standards such as Occupational Safety and Health Administration (OSHA) Standard 1910.1030 concerning blood borne pathogens and the cleanup of infectious waste. The kits are used in facilities such as hospitals, doctor's offices, and health care clinics. They are also used by cleaning crews specializing in trauma and crime scene clean up.
